THE ALL-NEW ELECTRIC

e:N1

FULL ELECTRIC, THE HONDA WAY

We're excited to introduce the e:N1, New Zealand's very first all-electric Honda. While the EV platform is new, the renowned Honda dynamic remains the same – a driving experience that is engaging, joyful and fun. It's a car first, an EV second.

GO THE DISTANCE

With three drive modes – Eco, Normal and Sport – the e:N1's electric powertrain offers maximum torque of 310 Nm and a range of up to 500* kilometres per charge. Charging from 30% to 80% takes around 40 minutes with DC fast charging.

Plus for your peace of mind, the EV battery is covered by an 8-year or 160,000 km warranty (whichever comes first). The e:N1 also comes with warranty of up to 5 years (unlimited kilometres, fully transferable) and free 24/7 Honda Roadside Assistance of up to 5 years (while under warranty).

The torque is finely tuned to give you the acceleration you'd expect from a quality EV while ensuring a smooth transition, avoiding passenger discomfort from a sudden change in speed.

*Based on optimal conditions.

RELAX IN STYLE

The e:N1's smart interior is focused on passenger convenience and comfort. Premium quality finishing combines with features that are streamlined and easy-to-use. These include an 8-way power adjust driver's seat, steering wheel-mounted controls, dual zone digital climate control, air-conditioning with dust/pollen filter, accessory power outlets and ample 348L boot capacity. The cabin has been designed as a quiet and relaxed space where you can chat easily without distractions.

Connectivity comes via a generous 15.1" display audio touchscreen that is split into three key zones for ease of use. At the top is navigation, infotainment and camera; the middle is dedicated to vehicle settings; and the bottom portion is a permanent climate control zone. The touchscreen is fitted with Wireless Apple CarPlay and Siri Eyes Free as well as Android Auto.

DISTINCTIVE BY DESIGN

The e:N1's exterior exudes refined simplicity. Sleek LED headlights, black cut alloy wheels, sporty bumper, wide charging-port door, and full-width LED tail light strip make for a distinctive, streamlined look. The charging point is in the middle of the front bumper, allowing for easy access no matter which side of the charging station the car is on. A lip above the port protects it from rain, and a three-colour light system gives you real-time information on the status on the charge.

HONDA SENSING

Rest assured, the e:N1 is built with the safety of you and your loved ones front of mind. The Honda Sensing suite of advanced safety technology features includes:

- » Adaptive Cruise Control
- » Collision Mitigation Braking System
- » Forward Collision Warning – integrated with CMBS
- » Lane Departure Warning
- » Auto High-Beam Support System
- » Low Speed Follow
- » Lane Keep Assist System
- » Road Departure Mitigation

Other active safety features include anti-lock braking system, vehicle stability assist with traction control, Blind Spot Monitoring, and Tyre Deflation Warning System.
